

Aiia Organizational Structure

From a resource allocation and financial perspective, the human capital of Aiia is structured across executive, management, and operational levels [1]:

- **Executive Board & Management:** Arthur Magaya and Dennis Magaya serve as Chairmen, while Arthur acts as CEO overseeing HR & Finance [1].
- **Departmental Leads:** Patience leads Business Operations, Godswill leads Development Standards, Anesu leads Innovation Planning, and Takudzwa manages Technical operations [1].
- **Staff:** Mark serves as a Graduate Trainee [1].

Human-Agent Integration for Work Optimization

To maximize the return on human capital and minimize operational overhead, AI agents should be integrated to absorb routine, high-volume tasks [2]:

- **Operations and Logistics:** Liam (Logistics & Supply Chain Coordinator) and Ada (Office Manager) can support Patience (Business Operations Lead) to automate inventory tracking, shipping, and administrative workflows, reducing overhead costs [1, 2].
- **Project Delivery and Analysis:** Pax (Project Manager) and Bram (Business Analyst) can assist Anesu (Innovation Planning Lead) and Takudzwa (Technical) by drafting requirements, mapping processes, and tracking project milestones to prevent project delays [1, 2].
- **Onboarding and Training:** Wren (Learning & Development Lead) can support Arthur (CEO, HR & Finance) by designing training programs and competency frameworks to accelerate the onboarding of staff like Mark (Graduate Trainee), lowering training expenditures [1, 2].

This balanced allocation ensures high-cost human resources focus on strategic growth while low-cost AI agents handle execution and tracking.
