Item	Description	Unit of measure	Quantity	Rate	Total Amount
	Description	Units	Qty	USD	USD
1	Post-Implementation Review (PIR) - IDC Core Banking System as per below TOR	No	1		

TERMS OF REFERENCE (TOR)

Post-Implementation Review (PIR) – IDC Core Banking System

1. Objective

The primary objectives of this engagement are to:

- Conduct an independent and objective assessment of the effectiveness, efficiency, and overall stability of the Core Banking System following its implementation.
 - Evaluate the extent to which the implemented solution aligns with approved business requirements, regulatory expectations, and industry best practices.
 - Identify any gaps, risks, control deficiencies, performance issues, and opportunities for optimization or enhancement.
 - Provide ongoing support to monitor, track, and independently validate the implementation of agreed remediation actions and system improvements prior to formal closure of the assignment.
-

2. Scope of Work

The consultant shall conduct a comprehensive Post-Implementation Review (PIR) of the IDC Core Banking System. The scope of work shall include, but not be limited to, the following areas:

1. Evaluation of the overall effectiveness, performance, and reliability of the IDC Core Banking System following go-live.

2. Assessment of the degree to which the project objectives, functional and technical requirements, success criteria, and expected business benefits have been achieved.
 3. Review of system stability, availability, scalability, performance, resilience, security controls, and compliance with applicable regulatory and supervisory requirements.
 4. Assessment of functional system performance, including validation of data migration accuracy, completeness, reconciliation processes, and overall data integrity.
 5. Evaluation of user adoption levels, adequacy and effectiveness of end-user training, change management practices, and overall operational readiness of the organization.
 6. Review of the operating and support model, including incident management, problem management, change management, and service management processes.
 7. Assessment of information security controls, user access management, segregation of duties, and compliance with internal policies and regulatory requirements.
 8. Evaluation of vendor performance in relation to contractual obligations, deliverables, and agreed service level agreements (SLAs).
 9. Identification and documentation of key gaps, issues, risks, and lessons learned arising from the implementation.
 10. Development of clear, practical, and prioritized recommendations aimed at remediation, system optimization, performance improvement, and future enhancements.
-

3. Deliverables

The consultant shall provide the following deliverables as part of the engagement:

1. **Comprehensive Post-Implementation Review (PIR) Report**
 - Detailed findings, root cause analyses, conclusions, and actionable recommendations supported by evidence.
2. **Executive Summary for Senior Management and the Board**
 - Concise, high-level overview highlighting key findings, material risks, critical issues, and priority actions.
3. **Risk-Rated Issues and Recommendations Matrix**
 - Categorization of identified issues by severity, impact, urgency, and assigned ownership.
4. **High-Level Remediation and Optimization Roadmap**
 - Sequenced remediation and improvement actions, including timelines, dependencies, and responsible stakeholders.
5. **Implementation Support and Validation Report (Critical Deliverable)**
 - Independent, evidence-based confirmation that all agreed recommendations and corrective actions have been fully implemented.
 - Validation testing outcomes, management sign-off, and formal closure of remediated issues.

Note: The assignment shall not be deemed complete until all agreed remediation actions have been implemented and independently validated by the consultant.

4. Consultant Qualifications and Requirements

Bidders must demonstrate the following minimum qualifications and capabilities:

- Availability of a multidisciplinary team with proven expertise in:

- Core banking systems
- IT architecture and infrastructure
- Data migration, reconciliation, and data integrity
- Cybersecurity and information security
- Risk management and regulatory compliance
- Evidence of having successfully completed at least two (2) Core Banking System Post-Implementation Reviews or equivalent independent assurance engagements within the last three (3) years.
- Demonstrated hands-on experience with IDC Core Banking platforms (mandatory requirement).
- Minimum of ten (10) years' proven experience in banking IT environments and/or core banking system implementations or upgrades.
- Submission of company financial statements, along with a high-level project methodology, approach, and proposed work plan.

5. Reporting

The consultant shall report to the designated Project Sponsor and provide regular progress updates throughout the engagement. Upon completion, the consultant will formally present the final findings, conclusions, and recommendations to management and other relevant stakeholders.

NB; Please attach quotation on the bid submission sheet provision provided in the Egp SYSTEM

1. All quotations must be shared via the Egp systems before the closing; <https://egp.praz.org.zw/>;
2. Deadline for submission will be on [**31 December 2025 at 1100hrs**]. Quotations will be opened promptly thereafter.
3. Late quotations, part of quotations, quotations not received and quotations not opened at the quotation opening ceremony shall not be accepted for evaluation irrespective of the circumstances.
