Key Responsibilities: - Overall engagement leadership and client liaison - Assurance methodology oversight - Quality assurance of all deliverables - Executive and Board-level presentations

Required Skills and Experience: - Minimum 10 years banking IT and post-implementation review experience - Proven IDC Core Banking platform expertise - Strong regulatory and risk management knowledge

2.2 Core Banking Systems Specialist

Key Responsibilities: - Functional and technical review of IDC Core Banking System - Validation of system configuration and performance - Assessment of benefits realisation

Required Skills and Experience: - 10+ years core banking implementation and review experience - Hands-on IDC Core Banking system expertise (mandatory)

2.3 IT Architecture and Infrastructure Specialist

Key Responsibilities: - Review of system architecture, infrastructure, and integrations - Assessment of performance, scalability, and resilience

Required Skills and Experience: - 10+ years in banking IT architecture and infrastructure - Experience in core banking hosting environments

2.4 Data Migration and Reconciliation Specialist

Key Responsibilities: - Validation of data migration accuracy and completeness - Review of reconciliation and data integrity controls

Required Skills and Experience: - 10+ years in data migration and banking data assurance - Experience in core banking data conversions

2.5 Information Security and Risk Specialist

Key Responsibilities: - Cybersecurity and access control assessment - Regulatory compliance and risk evaluation

Required Skills and Experience: - 10+ years in banking information security and IT risk - Knowledge of regulatory and supervisory requirements

2.6 Business Process and Change Management Consultant

Key Responsibilities: - User adoption and training effectiveness assessment - Review of change management practices - Operational readiness evaluation

Required Skills and Experience: - 10+ years in banking operations and change management - Strong business process optimisation background

3. Compliance with Technical Evaluation Criteria

This resource plan ensures: - At least three (3) senior consultants with 10+ years experience - Coverage of digital post-implementation, core banking, and operational expertise - Qualifications aligned to Business, Finance, IT, or Engineering disciplines

Individual CVs, certifications, and references can be attached to meet Annexure B requirements.
