

1 Definition and Data Sources

1.1 Name of the Use Case

Response

Not answered

1.2 Group sponsor of Use Case

Response

Not answered

1.3 Local sponsor of Use Case

Please provide a local sponsor for each market in scope

Response

Not answered

1.4 Use Case Business Owner Name

Please enter name and business title

Response

Not answered

1.5 Which Local Markets or Group Functions are in scope?

Response

Albania Czech Republic Egypt
 Germany Group GmbH (Germany) Business
 Vodafone Automotive VST Ghana
 Group Greece Ireland
 Italy Portugal Romania
 UK Vodacom SA Vodacom Lesotho
 Vodacom DRC Vodacom Tanzania Vodacom Mozambique
 Turkey VOIS Budapest VOIS India
 VOIS Romania VOIS Egypt VOIS Albania
 VOIS Spain VOIS Turkey VOIS UK
 VP&C VIOT Vodafone Americas
 Vantage Towers All of the above Other

1.6 What is the business purpose of the Use Case?

Response

CVM - Retention CVM - Data monetisation CVM - Convergence
 CVM - Additional product sales CVM - Recommender systems CVM - Customer acquisition
 COPS - Customer experience COPS - Online COPS - Call centre operations
 COPS - Billing COPS - Credit management Marketing - Product / proposition design
 Marketing - Brand Marketing - Segmentation Sales channels - Channel optimisation
 Network - Mobile Network - Enterprise Network - Fixed
 Fraud, Risk & Security - Fraud Finance - Margin management Finance - Financial planning and analysis
 Finance - Revenue recognition and assurance HR - Performance and talent management HR - Resourcing and recruitment
 HR - Reward and recognition HR - Payroll and expense management HR - Organisational Effectiveness & Planning
 HR - Operations and administration HR - Learning and development HR - Employee health, safety & wellbeing
 HR - Communication and involvement Enterprise - External monetisation Other

1.7 Please specify the processing (steps) in general terms

Response

Not answered

1.8 Does the Use Case apply to:

Response

☐ Consumers ☐ Enterprise ☐ Employees
☐ Other

1.9 To what products or business processes does the Use Case relate?

For example, is the Use Case supporting a certain product or process?

Response

Not answered

1.10 How long will you require the Use Case to run?

Response

☐ Once off request ☐ Daily ☐ Weekly
☐ Monthly ☐ Not sure ☐ Other

1.11 What are the intended outcomes or decisions to be made as a result?

Please enter as much detail as possible

Response

Not answered

1.12 Will any automated decisions on credit, refusal of contract, employment or similar decision with legal impact (typically contractual) be made as a result?

Response

☐ Yes ☐ No

1.13 What are the categories of data that will be used and what are their original sources?

Please describe the types of data used below.

Response

Not answered

1.14 Is the data already existing in the big data platform or do you have to inject from another platform?

Are you using an existing data sets for the analysis or do you require a new data set and new features to be created?

Please attach any new data sets that will be used in this analysis.

Response

☐ Existing data set ☐ New data set ☐ New features required

1.15 Volume of history per data source for use in building in this Use Case?

E.g. 6 months

Response

Not answered

1.16 Is the data:

Response

- ☐ Linked to an identifiable individual ☐ Anonymous ☐ Pseudonymised ☐ Other

1.17 What analytics platforms are proposed to be used?

Response

- ☐ Splunk ☐ Hadoop ☐ GCP ☐ Other

1.18 Is all the required data already on the Big Data platform?

If no, please specify and complete a 'Data Transfer' Request form

Response

- ☐ Yes ☐ No

1.19 Will any data be shared with a third-party?

If yes, please explain

e.g. Are we partnering or using any third parties to conduct the analytics for the Use Case or sharing the output of the use case with any third parties?

Response

- ☐ Yes ☐ No

1.20 Are third-party data sources used?

If yes, identify the means to ensure Vodafone has the right to use such data for the purposes of the Use Case, including reference to the agreement with third-party

Response

- ☐ Yes ☐ No

1.21 Is the Use Case a Permissions-based Use Case?

A Permissions-based Use Case is any use case that a customer has the ability to opt-out of. If this is the case, we must screen against their Permissions flags prior to running the model.

Examples of Permissions-based models are:

- Marketing
- Personal-level profiling for "value-add" such as CVM
- Use of their data in aggregate models to be passed to third parties for commercial arrangements

Examples of non Permissions-based Use Cases are:

- Fraud detection and prevention
- Security
- Aggregate network management and improvement

Response

- ☐ Yes ☐ No

1.22 Identify the process to ensure that the required Permissions are respected and that any possible changes to Permissions on a customer per customer basis are respected for the Use Case

For 'Permissions' see Use Case Standards for more information

Response

Not answered

2 Outputs and Risk Assessments

2.1 What is the format and intended output(s) of the model/use case?

Response

Personal data Pseudonymised Anonymous
Aggregated

2.2 Will the outputs contain any data other than a unique identifier and a list of recommended actions?

If yes, explain

Response

Yes No

2.3 If the output is pseudonymised, who has the key to reverse engineer?

Response

Not answered

2.4 If the output is anonymous, has the risk of reidentification been assessed?

Please attach evidence that the risk of re-identification has been tested.

Response

Not answered

2.5 Will any groups other than the following have access to the output?

Response

Big Data Analytics CVM (for CVM use Cases) Fraud (for Fraud Use Cases)
Network (for Network Use Cases) Technology staff directly supporting these Use Cases Billing and revenue assurance
Customer service Marketing Customer value management
Product management Technology operations Technology maintenance
Corporate Security Cyber Security Investigation team
Reporting/ Analytics teams/ Data scientists Finance, tax and accounting HR administration
HR L&D HR recruitment HR business partners
Property Management Supply Chain Management Corporate Governance
Legal

2.6 Identify potential benefits to the individual or society

Response

Not answered

2.7 What happens if the processing does not take place?

Response

Not answered

3 AI Ethics

3.1 Please tick the relevant options below

Response

Do you use computer systems able to perform tasks that normally require human intelligence, such as tailored recommendations, personalized decision-making, adaptive learning from experience, pattern recognition or speech recognition?

☐ Not applicable

Does your use case involve using software/tooling developed with advanced analytics or statistical approaches that learn from data such as customer behavior to infer the likelihood of a future event?

☐ Not sure

3.2 Does your use case involve any of the following processes?

Response

1. Biometric identification and categorization of natural persons e.g., photo of face, record of voice or image of fingerprint to personalize customer experience, for authentication or to reduce instore interaction time

2. Credit scoring e.g., prediction of credit behavior while onboarding a new telecom customer or during billing and credit management

3. Access to private services e.g., advanced analytical techniques and approaches to determine access to our offerings

4. Management and operation of critical infrastructure e.g., utilization of advanced analytical techniques and approaches in network planning, network optimization, improvements of network security, fault detection / maintenance or network repair

5. Education & vocational training e.g., leveraging advanced analytical techniques and approaches for internal training or professional development

6. Employment & worker management e.g., utilization of advanced analytical techniques and approaches in talent management, recruiting or hiring

7. AI systems interacting with humans, i.e., chatbots or voicebots such as conversational IVR to automate customer self-service

8. Emotion recognition e.g., identification of human emotions through advanced analytical techniques and approaches

9. AI systems that generate or manipulate images, audio, or video content, i.e., deep fakes

☐ 10. Law enforcement

☐ 11. Migration, asylum and border control

☐ 12. Administration of justice and democratic processes

☐ 13. None of the above

☐ Not sure

3.3 Does the solution you are aiming for in your use case / project support you in rating customer's probability to pay for their direct debit or invoices?

Response

☐ Yes

☐ No

☐ Not sure

3.4 Does your use case / project involve deciding which products or services to offer a customer?

Response

☐ Yes

☐ No

☐ Not sure

3.5 Does your use case / project involve building or maintaining the Vodafone network?

Response

☐ Yes

☐ No

☐ Not sure

3.6 Does the solution you are aiming for in your use case / project support you in any HR activities?

Response

☐ Yes

☐ No

☐ Not sure

3.7 Does the solution you are aiming for in your use case / project assist in employee upskilling?

Response

☐ Yes

☐ No

☐ Not sure

3.8 Does your use case / project involve support in direct customer interaction either in voice or text?

Response

☐ Yes

☐ No

☐ Not sure

3.9 Are you using an AI system provided by an external party?

Response

☐ Yes ☐ No ☐ Not sure

4 FOR PRIVACY TO COMPLETE

4.1 Is the Use Case compatible with the purposes of personal data processing as communicated to the data subject?

Response

☐ Yes ☐ No

4.2 Are permissions necessary and have they been sufficiently acquired?

Response

☐ Yes ☐ No

4.3 Are there effective controls to ensure respect for permissions?

Response

☐ Yes ☐ No

4.4 Does the use case require filters to be applied based on customer permissions?

Response

☐ Yes ☐ No

4.5 What filters must be applied?

Filters must be applied for each of the categories selected below to ensure that individuals who are opted out are removed from the use case.

Response

☐ Billing and Account Data ☐ Network and Traffic Data ☐ Location Data

4.6 Is there a legal basis justifying this use case?

Response

☐ Consent ☐ Contract ☐ Legal obligation
☐ Vital interest ☐ Public interest ☐ Legitimate interest
☐ Not applicable as Processor

4.7 Is the use of personal data proportionate, necessary, fair and justified and not excessive or unexpected?

Response

☐ Yes ☐ No

4.8 Identify potential risk or harms to individual or society

Response

Not answered

4.9 If the Use Case was discussed in public, would it be likely to cause reputational damage to Vodafone?

Response

Not answered

4.10 Identify controls to effectively manage these risks

Response

Not answered

4.11 Are the requirements concerning automated decision making or creation of other similar impacts satisfied?

Response

☐ Yes ☐ No

4.12 Does a data processing agreement cover the Use Case?

Response

☐ Yes ☐ No
☐ Other

4.13 If third party data sources are used, does Vodafone have the right to use such data for the purposes of the Use Case?

Response

☐ Yes ☐ No

4.14 Is the activity in question subject to notification or authorization by a data protection authority or other authority?

Response

☐ Yes ☐ No

5 AL - Albania

5.1 Name of approving Privacy Officer (AL)

Response
