

# Virtual Worker Platform (VWP)

- AI-powered digital workforce platform
- Combines Hugging Face intelligence with n8n automation
- Governed, auditable, enterprise-ready execution engine
- Focus: Finance, Ops, Sales, Logistics, Developer workflows

# The Problem

- Manual repetitive digital tasks consume operational time
- AI tools lack execution governance
- Automation tools lack intelligent interpretation
- Organizations need safe AI + deterministic workflows

# Our Solution

- Natural language task intake
- Template-constrained execution model
- Approval-first governance system
- Multi-tenant, secure architecture
- Full audit trail for every action

# MVP Focus Areas

- Finance: Reporting, invoice drafts, budget summaries
- Technical Operations: Incident reports, ticket automation
- Sales & Marketing: Lead capture, CRM entry, outreach drafts
- Logistics: Shipment tracking, inventory alerts
- Developer: PR summaries, CI/CD status, deployment checklists

# Why It Matters

- 50%+ reduction in manual digital workload
- Safe AI execution with approval gating
- Reusable automation templates across departments
- Scalable digital workforce foundation
- Clear path to enterprise expansion
